

Newsletter DIGITALLI #3 – June 2026

Moving from Theory to Practice

The DIGITALLI project is officially entering its next phase! We are moving forward with our mission to empower Lifelong Learning Institutions, equipping them with the cutting-edge Digital and AI Strategies needed to thrive in today's educational landscape.

Milestone : Localisation of DIGITALLI Toolkit (WP2)

We are proud to announce that following the successful pilot assessment of the Toolkit by the Project's Local Steering Committees, the Toolkit is now available in all partners' languages.

Digital Learning Transformation Expert System (WP3)

We have officially launched our interactive platform and system that guides lifelong learning institutions on establishing and implementing digital transformation action plans. The pilot phase of the WP3 - Digital Learning Transformation Expert System in DIGITALLI partner countries has come to an end. The constructive feedback received during this phase helped us further improve the system and make it as useful as possible for adult leaders developing digital competences. To ensure wide accessibility, the system is fully translated into partners' languages, including German, Greek, and Slovenian, and is available on the project's website.

Pilot Implementation for Human Capital (WP4)

During May and June 2026, DIGITALLI partners are carrying out pilot activities focused on strengthening the digital competencies of adult educators and supporting digital transformation in lifelong learning. Each partner is currently implementing two face-to-face (f2f) training sessions in their country, reaching at least 20 adult educators/trainers.

What's Next

- Completing the training sessions for adult leaders and educators using the newly developed content.
- Implementation of national workshops for the dissemination of the project's results in Cyprus, Slovenia, Ireland and Greece.
- Hosting the Final Project Conference and the last sustainability meeting with the partnership in Austria.
